

AES™ by NetIDEAS

AES by NetIDEAS is a web-based Design to Order service that automates the design and sales process so your customers have the ability to procure customizable products that meet their unique specifications.

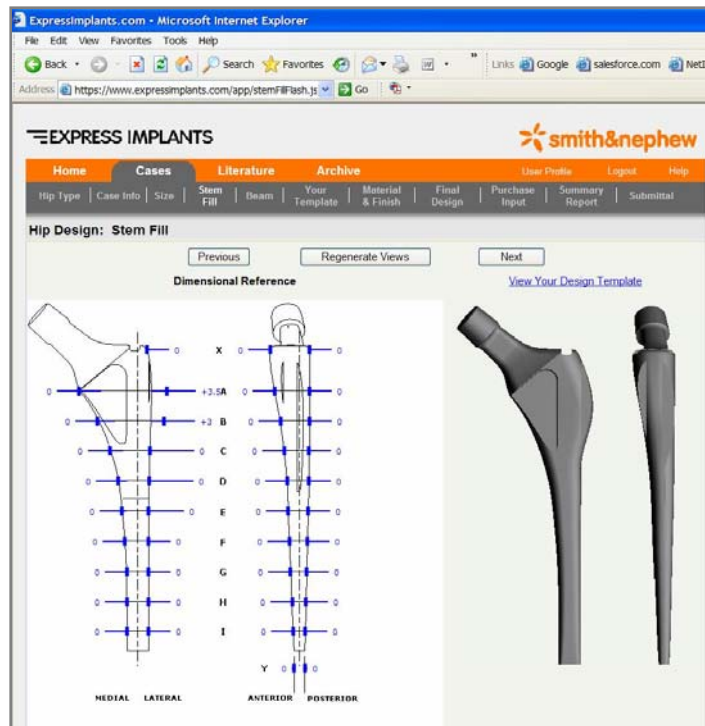

AES enables a secure “Self Service” design environment on the Internet for your customers to iterate on your product’s design flexibility without obtaining the specific Intellectual Property or tying up your personnel resources. When they have established the design that works, they can procure it right away.
