

Managing and collaborating on project data and product designs is

a necessity for today's world-class product manufacturers and DoD. Utilization of the Internet to speed that process means securing your company data has never been more critical.

Benefits

- Compliance to DoD Regulation 5000.2-R.
- Quick Hassle-Free Deployment: "Time-to-Benefit in Months, not Years"
- Hosted, Managed, and Supported Applications to ensure program success: "One-stop Resource"
- Seasoned Business Partner with IDE Domain Expertise: "Proven Experience and Results"
- Years of Production Experience in DoD Industry: "Security Expertise"
- All you need is a web-browser: "Lower Total Cost of Ownership"

About Us

NetIDEAS is a leading provider of Hosted IDE Solutions for Program and Product Development based Organizations. Headquartered in the suburbs of greater Philadelphia PA, NetIDEAS implements, manages, hosts, and supports Internet-based Integrated Digital Environment (IDE) and Collaborative Product Development (CPC) Solutions. All Solutions are intended to securely link the geographically distributed enterprise, supply chain, and customer base with access to innovative services, product and process information, and life-cycle applications using the Internet. By enabling this knowledge network, time to market, outsourcing, performance improvements, and competitive positioning objectives can be greatly improved. NetIDEAS is an ideal solution for companies with minimal IT resources, minimal budget, Speed-to-Readiness issues, and/or outsourcing requirements.
